

TOKHEIM CRYPO VGA™ OUTDOOR PAYMENT SYSTEM

The Tokheim Crypto VGA™ outdoor payment system from Dover Fueling Solutions is our most advanced outdoor payment system. The revolutionary touchscreen makes payment faster and easier for your customers. Intuitive onscreen graphics quickly and easily guide the end user through the debit, credit, fuel and loyalty card process. It is not just about innovative design though; the Crypto VGA is an extremely secure transaction solution, certified in accordance with the latest PCI approvals and incorporating a set of robust, anti-fraud mechanisms.

“Dover Fueling Solutions has PCI approval to the highest level achievable. It’s a future-proofed path providing the most effective security solution for sensitive payment card information.”

Crypto VGA at a glance

Touchscreen

A full colour touchscreen guides the customer clearly through the transaction process. All additional data related to the transaction, such as vehicle identification and mileage, can also be processed using the unique touchscreen.

Payment Methods

The Crypto VGA is certified to process credit, debit, fuel and loyalty cards, and offers an integrated solution for emerging payment technologies such as contactless cards, RFID and smartphone payment (NFC). Additional applications such as carwash, e-ticketing and e-vouchers are also available.

Anti-fraud Protection

An integrated privacy shield plus advanced anti-tamper and anti-skimming devices, that are constantly reviewed, help counter fraud attempts.

Paper Roll

The Crypto VGA is delivered with the industry's largest paper roll for issuing receipts. It lasts up to 4 times longer than the paper roll of other OPT suppliers.

The outdoor payment range

Crypto DIT

A single or double-sided solution that fits neatly across the range of Quantum dispensers offering a payment option, as well as tailored retrofit solutions for Tokheim legacy and other third party dispensers. The DIT payment terminal is always securely installed within a specially designed anti-fraud protection housing unit.

Crypto Slimtouch

A compact, standalone outdoor payment terminal, combining sleek looks and a smart design. It can connect and control payment for multiple dispensers (including third party dispensers) on one site.

Crypto BNA

A smart, secure design that is available as a single or double-sided solution. The Crypto BNA accepts bank notes as well as card and RFID payment. The cash is housed in a safe compartment within the unit that utilises the latest sensor and alarm technology.

Less service, less hassle

Engineered at Tokheim's European manufacturing centre using innovative, strong, and robust components, the Crypto VGA benefits from Tokheim's renowned Quality testing processes.

Local knowledge, global team

Tokheim has an international support network that puts service first. We are there every step of the way to find effective solutions to complex retail challenges.

Crypto VGA Technical Specifications*

Base model

- iMX31 secure processor
- 6.4" colour VGA display with a touchscreen which is also a PCI compatible PIN pad
- EMV & PCI PTS POI compatible secure hybrid card reader (magnetic stripe + chip)
- Thermal ticket printer with paper detection with large paper roll >400 m
- The printer unit can be accessed separately for easy paper roll replacement
- LAN connection to POS system
