

TOKHEIM QUANTIUM™ LPG FUEL DISPENSERS

There are many LPG (Liquefied Petroleum Gas) dispensers in the market and it can be a difficult task to select the right product for your business, but we can help you to select the right solution for your forecourt from a range of models. We aim to provide you with a safe, reliable and quality LPG dispenser that will have a reduced cost of ownership over the lifetime of the pump.

“Our portfolio of LPG dispensers aims to offer you flexibility when it comes to the unique layout of your fuelling station.”

Quantium 510 LPG at a glance

Design

Built to be truly modular, you can select it as a stand-alone product or combine it with our multiproduct dispensers (Quantium 510 LPG combo).

Payment

The Crypto VGA, Tokheim's outdoor payment solution, is an all-in-one touchscreen and secure pin pad. It helps increase your retailing options, makes your site more secure, reduces the risk of drive-offs and ultimately increases profits.

Hose management

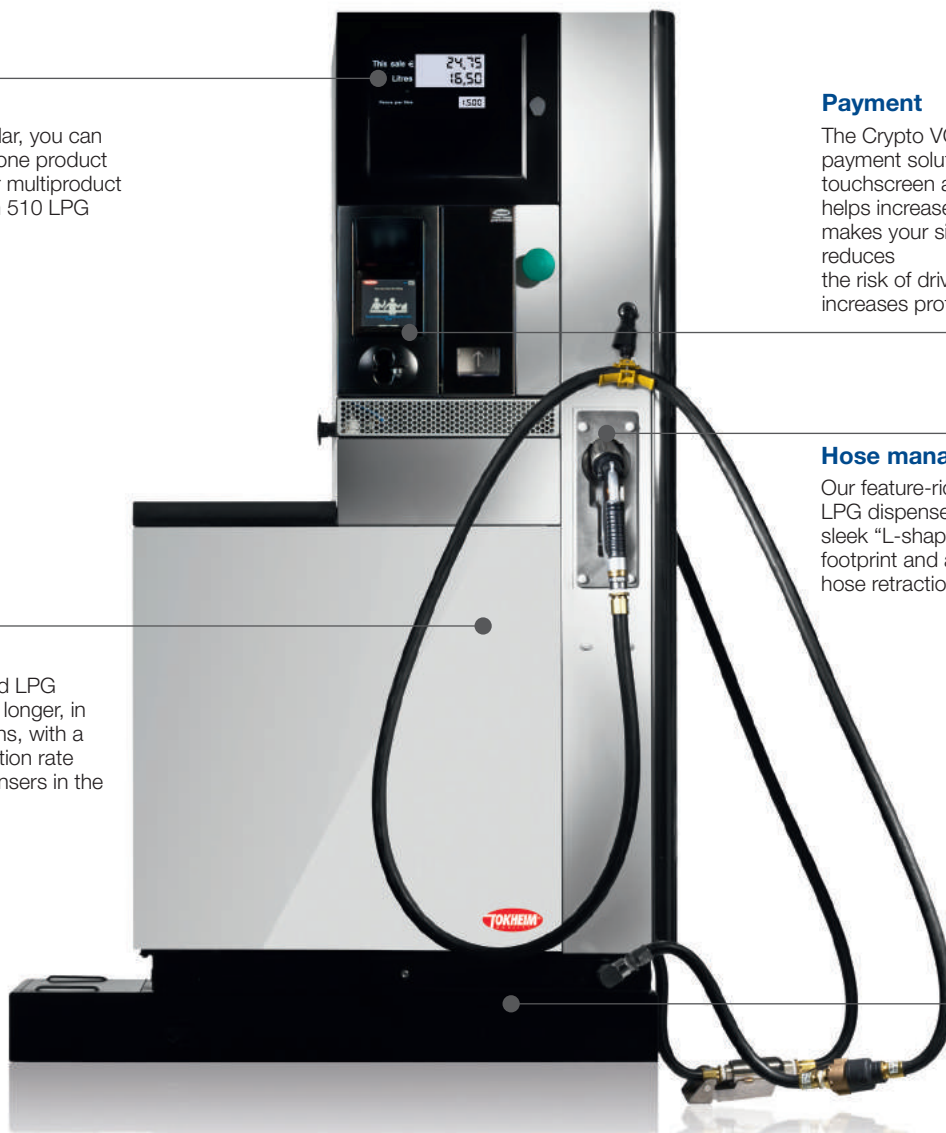

Our feature-rich Quantium 510 LPG dispenser is delivered in a sleek “L-shape” design with a small footprint and a clean and simple hose retraction management system.

Hydraulics

The specially designed LPG components work for longer, in the toughest conditions, with a lower service intervention rate than other LPG dispensers in the marketplace.

Lifting slots

Quantum dispensers are equipped with lifting slots as standard. This solution provides the industry's highest level of safety and security during dispenser's onsite installation and removal.

Our LPG Dispenser range

Quantum 110 LPG

A very compact and robust entry-level LPG dispenser for your station with only one nozzle that is ideal for both the retail and commercial fleet environments..

Quantum 210 LPG

The simple design yet robust performance of the Quantum 210 LPG dispenser makes it ideal for both the retail and commercial fleet environments..

Quantum 510 LPG

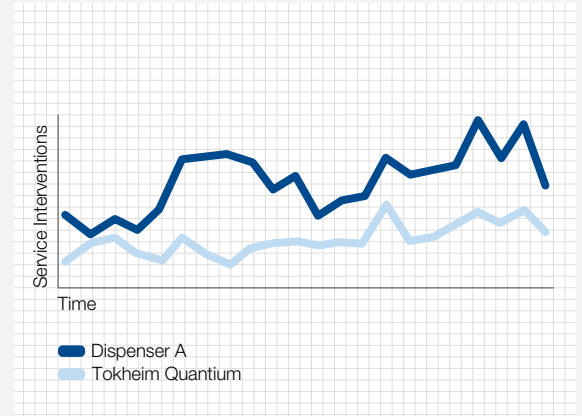

A sleek higher end, stand-alone dispenser with payment and media options. A small footprint and a clean and simple hose retraction management system.

Quantum 510 MPG Combo

LPG dispenser combined with a multi-product dispenser (up to 10 nozzles).

Quality and Reliability

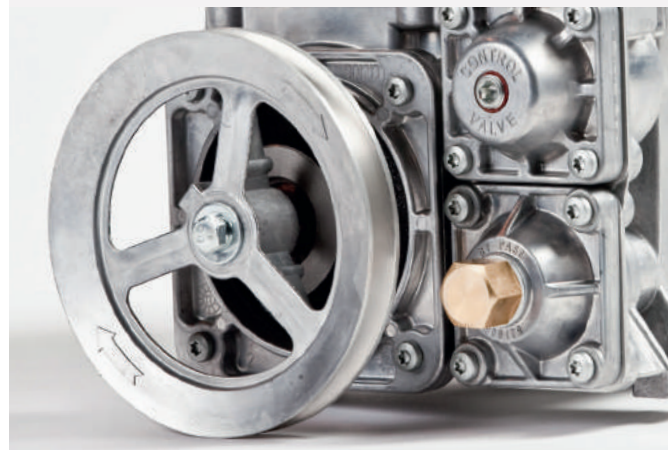

Less service, less hassle

Tokheim's Quantum dispensers have been independently verified to have less service interventions than other industry installed and supplied pumps. Greater uptime means improved throughput and your customers can rely on your service station for a faster and more pleasant refuelling experience.

A safer environment

For added safety, we provide an LPG hydraulic chair to ensure the performance of the shear valves if, by chance, there is any crash impact on your LPG dispensers.

Quantum 510 LPG Technical Specifications*

Base Models

- Standard speed (40 l/min)
- LPG one- and two-hoses (linked to product model)
- Combined hoses for unleaded products**
- Multi-product dispenser with integrated LPG**
